Honey,
can you hear
me?

WHAT?

Do you often run into the need for asking people to repeat themselves?

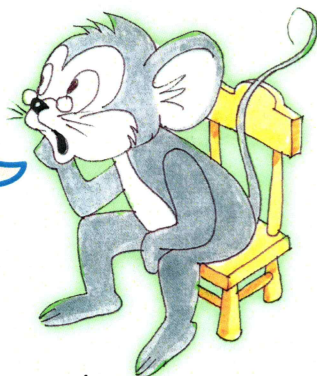

This puts a damper on family, friends, fun, and life in general.

When one does not have a *keen sense of hearing*, daily communication can be stressful and difficult. It can cause social isolation and greatly reduce the quality of life for you and your loved ones.

Don't be trapped. You too can live happily ever after!

How can you easily prevent this common problem? It is as simple as having your vision corrected. We can help you hear great!

Who can I
trust to help
with my hearing
health?

An Audiologist

At the Mendelson Group, our trusted Doctor of Audiology has over 45 years of experience in diagnostic testing and hearing aid fittings. We also now have the skillful support of a Hearing Aid Dispenser.

You can count on our compassionate experts to give you sound advice! Get to personally know healthcare professionals who are highly trained in the proper diagnosis and treatment of hearing loss.

You and your family should only trust professionals with *true character* and your best interests at heart.

Do you need a hearing aid?

A fact-based hearing evaluation will help us decide if you would benefit from a hearing aid, medical intervention, or both.

If you need a hearing aid, rest assured we will suggest the right fit for you. Based on lifestyle needs, ease of use and cosmetic appearance, Dr. Gary and his colleague will assist you in making the best choice.

So which
Audiologist should
I go to?

OF COURSE, WE RECOMMEND The Mendelson Group

For over 45 years, our well-respected practice has proudly been a comprehensive community resource. We help all those entrusted in our care to learn how advanced digital technology can improve communication ability in just about all hearing environments. We provide the finest audiological services. *Always have, always will.*

Our patients and friends come from all walks of life for a lifetime of care. We have helped teachers, doctors, salespersons, housewives, farmers, mechanics, corporate executives, politicians, diplomats and many others to be perfectly fitted with their best hearing health solutions, improving their quality of life.

They all learned that today's state-of-the art technology is not what many remember as "their Grandfather's hearing aids" and *how sweet it is* that hearing health testing can be conveniently taken care of in your home, office or senior living community.

OK!
What should
I do?

Call to
schedule your
personal hearing
evaluation.
